On Page 2, change July 1st to June 30th This is the result of an internal SAWS error and has apparently been erroneously included in past work plans.	SAWS	Referred to EAA	EAA	Y	Date changed as requested
Measure 5.7.2 - SAWS will be seeking changes to the water quality monitoring plan through the upcoming work of the water quality work group, but will support this plan as a placeholder.	SAWS	Referred to EAA	EAA	Not at this time.	After the Water Quality Monitoring Work Group completes their recommendations, any suggested changes to Water Quality Monitoring Work Plan will be reviewed by the Science Committee, Implementing Committee and EAA for consideration.
Measure 6.3.3 - SAWS notes that this work plan includes, as a paid task, a literature review, which was a practice that did not receive favorable mention in the National Academies of Sciences' (NAS) Report #1. SAWS may seek a budget change and work plan amendment after the work of the NAS Report #1 work group.	SAWS	Referred to EAA	EAA	N	The Literature Review for the Ecological Model has been completed. The Work Plan reflects the work that has been done in Year 1 and 2 and that will be done in Year 3.
Program Management - Are there two new positions under consideration in this work plan? What are the black boxes in the organizational chart?	SAWS	Referred to EAA	EAA	Y	The organizational chart has been amended to answer questions posed by SAWS.
Attachment 11 of the May 21st , 2015 Implementing Committee meeting - Please amend the notation on the budget comments column to reflect that the EAA Board of Directors, not the Implementing Committee, approved adjusting the rates paid for leased groundwater rights for use in the Aquifer Storage and Recovery conservation measure.	SAWS	Referred to EAA	EAA	Y	Change has been made.
