

Preparation for the January 25-26 workshop (3 hrs)

Possible goals for this facilitated segment of the meeting:

1. Get better prepared for January 25-26 by refining our thinking and improving decision tools (without engaging in decision making).
2. Where do we need to be at the end of February? How do we get there?
3. Refine the tools that we will use at the January workshop (Option descriptions, Option matrix)
4. What information about each Option do we need and how do we get it?

Topic	Time used (mins)	Process or method
Where do we need to be at the end of February? (McMahon/Gulley)	20	Where are we on the decision path? Where do we need to be? What do we need to accomplish to get there?
Success criteria: Survey results (McMahon)	35	Handout of survey results <ul style="list-style-type: none"> • Assess what the Plenary thinks of the survey results
Review of status on developing options (overview not negotiation) (McMahon) <ul style="list-style-type: none"> • What are the option descriptions? How can they be improved? 	100	Do we have agreement on the options for getting water to the species when the species need it (but not negotiate which options are best) <ul style="list-style-type: none"> • What technical input do we need to make a first level decision on the most promising options? How do we get it? Move to Small Groups to discuss these questions Return to plenary: Review results of small groups
Review and improve the agenda for January 25-26 (McMahon)	15	Would it help to have the options set out in the context of some mitigation and minimization options, <i>i.e.</i> , to see what a complete package might look like? The purpose of the package would not be to make or suggest any decisions but simply provide context to assist the EARIP.
Process questions and suggestions for EARIP: how do we make this function better? (McMahon)	10	Plenary: Q&A
