

Edwards Aquifer Habitat Conservation Plan

Report 2 Implementation Plan

July XX, 2017

Executive Summary

DRAFT

[Table of Contents](#)

Introduction: EAHCP Report 2 Implementation Plan 3

Hydrologic Modeling Recommendations 4

Ecological Modeling Recommendations..... 5

Monitoring Recommendations..... 6

Applied Research Program Recommendations..... 7

Mitigation & Minimization Measures Recommendations..... 8

Conclusion 9

References Cited 10

Appendix A: Abbreviations & Acronyms [IF NEEDED] 11

Appendix B: Glossary [IF NEEDED]..... 11

Appendix C: NAS Report 2 Work Group Charge 11

Appendix D: Agendas and Meeting Minutes of the Work Group..... 11

Appendix E: Report 2 Implementation Plan Matrix 11

Appendix F: Workshop Report 11

DRAFT

Introduction: EAHCP Report 2 Implementation Plan

Discuss what HCP is (1-2 sentences)

Discuss role of NAS as Science Review Panel in relation to HCP as determined by FMA and HCP

Discuss review process of EAHCP by NAS established by contract

Mention Report 1 and briefly recap review (Work Group and Workshop) and implementation process; cite feedback received over review process and how we are consciously addressing that feedback to improve this go-round

Provide overview of issues Work Group faced in producing this Plan and how they did their due diligence concerning multiple factors (include table showing criteria used in implementation matrix)

Discuss structure of this document, noting each section gives overview of key issues that emerged in Workshop comments, Work Group discussions, and a high-level description of how these were resolved and what the final recommendation(s) were; mention what is included in the Appendix

Hydrologic Modeling Recommendations

Provide short overview of Hydrologic Model is in the context of HCP requirements
Provide high-level overview of NAS Hydro Modeling recommendations
Provide summary of Workshop feedback received
Provide summary of Work Group recommendations
Refer to matrix for details

DRAFT

Ecological Modeling Recommendations

Provide short overview of the Ecological Model in the context of HCP requirements

Provide high-level overview of NAS Eco Modeling recommendations

Provide summary of Workshop feedback received

Provide summary of Work Group recommendations

Refer to matrix for details

DRAFT

Monitoring Recommendations

Provide short overview of the Monitoring programs in the context of HCP requirements

Provide high-level overview of NAS Monitoring recommendations

Provide summary of Workshop feedback received

Provide summary of Work Group recommendations

Refer to matrix for details

DRAFT

Applied Research Program Recommendations

Provide short overview of the Applied Research program in the context of HCP requirements

Provide high-level overview of NAS Monitoring recommendations

Provide summary of Workshop feedback received

Provide summary of Work Group recommendations

Refer to matrix for details

DRAFT

Mitigation & Minimization Measures Recommendations

Provide short overview of the Mitigation and Minimization Measures in the context of HCP requirements

Provide high-level overview of NAS Monitoring recommendations

Provide summary of Workshop feedback received

Provide summary of Work Group recommendations

Refer to matrix for details

DRAFT

Conclusion

Wrap-up
